

OUTSIDE FACILITY NOTICE

Please be aware that when you are referred to outside providers, labs and radiology facilities, those facilities may not be providers for your health plan and/or the particular test or procedure for which you are referred may not be a covered benefit through your health plan. We do attempt to refer you to facilities which are members of most major health plans. However, there are hundreds of different health plans that we are a part of and it is not possible for us to know the details of all of these plans.

It is your responsibility to know the details of your health plan.

If you are in doubt as to whether a procedure, test or x-ray is covered or are unsure as to where it must be performed, please contact your **health plan's member services department.** Below is a list of the laboratories we use. You may contact them directly to inquire whether or not they are providers for your health plan.

I understand that this office will not be responsible for out of pocket expenses incurred from utilizing the wrong facility and/or receiving non-covered services.

Signature

Date

West Pacific	(949) 548-7500	Used for all bloodwork, cultures, pap smears & pathology.
LabCorp	(949) 646-7194	Used for all bloodwork, cultures, pap smears & pathology.
Quest Diagnostics	(866) 697-8378	Used for all bloodwork, cultures, pap smears & pathology.

If you desire a lab other than the ones listed above to be utilized, you need to notify us in advance so that we can arrange a special pick-up of your specimen.
